

Occupational Therapy (OT) Services

AlphaBee is excited to launch Occupational Therapy (OT) to our new and existing families. OT can assist children with a variety of skills including fine motor skills, play & socialization, self-care & life skills, and focus & attention.

Meet the Occupational Therapist!

Dina Kalales, OT

Dina is a private pediatric practitioner with 15+ years experience. She is dedicated to supporting children with sensory, life skills, self-care, fine or gross motor difficulties in order to enable children to achieve their personal best in life and school.

How Does it Work?

1. Each child will undergo an assessment to understand their fine and gross motor, sensory, and school needs.

3. For children receiving ABA services through AlphaBee, the staff working with the child will be directly trained by the occupational therapist on how to implement the occupational therapy strategies and accommodations.

2. Each child will have personal occupational therapy goals within the program. These will be developed through the OT assessment and interviewing the parents, Senior Therapist, speech therapist and other community partners involved with the child.

4. Re-evaluation of each child's needs will be completed periodically.

Occupational Therapy (OT) Services

AlphaBee is excited to launch Occupational Therapy (OT) to our new and existing families. OT can assist children with a variety of skills including fine motor skills, play & socialization, self-care & life skills, and focus & attention.

Session Structure

Prior to starting OT services, there is a Service Agreement as well as consent forms, COVID waivers, and an intake form to be completed.

Sessions are 1 hour and may be weekly, bi-weekly, or monthly.

OT sessions may be during your child's ABA sessions (the IT will observe) or as a separate service at one of our centre locations.

The OT will also meet with your child's Senior Therapist (for children also receiving ABA services) outside of session time to review goals and programming.

OT reports will be completed by the occupational therapist at the request of the family.
